Rutgers, New Brunswick, NJ - Spring 2020
Bachelor of Science, Computer Science

Brookdale CC, Lincroft, NJ - Fall 2017

Associate of Science, Computer Science

LANGUAGES

Javascript, HTML, Java, Python, C, SQL.

LIBRARIES/FRAMEWORKS/ETC.

Angular, React, Tailwind, NPM, CSS, Ant Design, Bootstrap, Git, Figma, Postman, BASH, ChartJS

WORK EXPERIENCE

Inncretech, Princeton, NJ — *Programmer*

Sep 2020 - PRESENT

As a front end software engineer I worked with a team on various small and large scale projects. The projects ranged from websites to larger web apps written with javascript in Angular or React. The projects my team and I worked on have been used by thousands of people and are very reliable.

Vorsi, Hudson Valley, NY — Intern Programmer

May 2019 - Aug 2019

Vorsi is an enterprise resource planning software for businesses that has many services which help them run efficiently. While I was there I worked with another developer and under his leadership I learned how to work on large scale applications.

Brookdale CC, Lincroft, NJ — *Tutor*

Jan 2017- Jan 2018

At my local community college I tutored students in computer science courses. The topics I mainly assisted students with were Java programming, SQL and DB management, data structures, and occasionally Excel work.

PROJECTS

Term Grid — *Work Project*

This web app is a software used by large companies that are in the processes of buying/merging other companies and has been used in billion dollar deals. With a team I worked on implementing new features and migrating to React from AngularJS to make it more efficient and fast.

Sew Honey Store — *Personal Project*

This project was created to assist a friend in selling her home made swimwear online. I had an admin console to help her add / update/ remove products from her store and the actual ecommerce website. The site is not in use anymore but it was very helpful for her to grow her business.
