Work Experience

General Electric Corporate | Atlanta, GA (Remote)   May 2022 - Present
Front End Software Engineer
- Migrated the cloud service order management system from Angular to React and Typescript, resulting in a more efficient and responsive system with a cleaner UX/UI.
- Developed a React component library for reusable components, saving time on future development and bug fixes.
- Maintained the project by adding requested updates, debugging, and creating use case tests to minimize bug fix time.

Inncretech | Princeton, NJ   August 2020 - May 2022
Programmer, Front End
- Collaborated on a variety of small and large-scale projects, delivering responsive, ADA compliant, and SEO optimized websites to clients.
- Worked closely with executives to deliver scalable products with thousands of users.
- Mentored new developers and created training programs to teach the fundamentals of React and Typescript.
- Participated in the hiring of junior developers through resume screenings, interviews, and technical assessments

Vorsi | Hudson Valley, NY   May 2019 - August 2019
Intern, Front End Developer
- Worked with a mentor and under his leadership I learned how to work on large scale applications.
- Using JS I implemented a feature that allowed users to download auto generated pdfs with customer data and analytics in table and graph formats.
